Held-out prediction distributions by true edge label (BCE models)

Predictive only
End-to-end ($\lambda = 0.1$)
Temperature scaling
Isotonic regression

dream5_net1 / small — True edges

dream5_net1 / small — Negative pairs

dream5_net1 / medium — True edges

dream5_net1 / medium — Negative pairs

sergio / small — True edges

sergio / small — Negative pairs

sergio / medium — True edges

sergio / medium — Negative pairs

Cumulative proportion

Predicted edge probability
