GRN feature-shift stress test — dream5_net1
ECE (10 bins; lower is better)
Brier score (lower is better)
Calibration-in-the-large (lower is better)
AUPR (higher is better)
predictive only
end to end lambda 0.5
end to end lambda 0.1
temperature scaling
isotonic regression
small, in distribution
small, shifted features
medium, in distribution
medium, shifted features
